

# Daylighting Summer Course

July 8th – 22nd 2012

DAY  
LIGHT  
THINKING

Human Well Being • New Technologies • Awareness • Daylight Matter

OSRAM OSRAM  
FAGERHULT RETRO  
SOLAR

## LECTURERS

Ilaria Abbondandolo • Helmut Köster • Philippe Rahm • Henrik Clausen • Alessandro Gobetti • Orsenigo – Chemollo • Traverso-Vighy • Marina Vio • Vitale Zanchettin

## TOURS TO BUILDINGS BY

Alvar Aalto • Tadao Ando • Sverre Fehn • Massimiliano Fuksas • Renzo Piano • Carlo Scarpa • James Stirling • Traverso-Vighy

## DAYLIGHT THINKING PROGRAM

An intensive two-week summer program introducing the culture of daylight both as an expressive device, and as a technical tool for a sustainable design approach. Artificial light is presented not as an independent topic, but both in its integration with daylight and its increasing capacity as a key component for a positive impact on human well-being. The course stands as an intensive educational experience set against a backdrop of the Italian Veneto, where participants are involved in daylight matter and its design, simulation and integration.
